Syllabus e_class

Notice

- Class Registration, All students have to register this link
- Zoom URL : Meeting ID : 867 813 7471, pw: xxxx, (if needed, to be noticed ..)

Supplementary data

- C Programming Language 2nd Ed. pdf (only refer to study)
-

Extraordinary Activity

- 모두의 창업(https://modoo.or.kr), Modoo_Startup_Application_Guide_EN.pdf, 모두의창업_접수용_아이디어정리_리포트_EN.docx
- Campus Spatial Blueprint for International Students (updated 18, Sept)

Lecture Notes

Week 1 Introduction to the Programming Method

- Introduction to the CGIM Lab
- survey_programming method(2026-2) : use QR code

Week 2 ch01_Tutorial Introduction

-

Week 3 ch01_Tutorial Introduction

- continue from week2

Week 4 ch02_Types, Operators, and Expressions

- Lecture Video

Week 5 ch03_Control Flows_eng, ch03_Control Flow_kor

- exercise: upload it to eclass.
- homework ch02_1(kor)

Week 6 ch03_Control Flows_eng, ch03_Control Flow_kor
contine from wee4

- test for chapter 03 (kor)
- QR code for padlet (file upload)

Week 7 ch04_Functions and Program Structure

- Source code of ch04 :
  - sec4.1 particular pattern matching.c
  - sec4.3 calculator with postfix

Mid term C Programming Chapter-by-Chapter Code Management & GitHub Submission

- submit here, due : 5th, November

Week 8 ch05_Pointer and Arrays

- movie clip for ch05 Pointer and Arrays:
  - ch05_1 Pointer Fundamentals & 1D Arrarys,
  - ch05_2 Pointer Arrays and Memory Management,
  - ch05_3 Multi-dimensional Arrays, Pointer Arrays, and CLI Arguments,
  - Homework: Write the examples presented in each video clip as code and commit them to GitHub separately.
  -
- Source code of ch04 :
  - sec5.6 readline using pointer arrays
